Hughes Communications launches new tariff plans for VPN services, June 2 '09

<http://www.telecomtiger.com/fullstory.aspx?storyid=6269>

Hughes Communications announced new tariff plans for VPN services offered to the enterprise segment as part of its managed services offerings.

Hughes said that the new plans are built on new generation satellite modems which are capable to provide MPLS grade QoS, very high uptime, IPSEC implementation for security, SNMP enabled, integrated with FCAPS software and will be offered on both terrestrial as well as satellite mode with same level of performance metrics.

Unveiling the packages, K. Krishna, AVP Marketing, Hughes Communications India Ltd., said, " Indian Enterprises have started to look beyond the metros and big cities for growth especially in sectors like retail, logistics, banking and finance amongst others. This requires them to get reliable and consistent connectivity across the country. "

"We at Hughes believe in simplifying and demystifying the satellite as a medium. The recent advancements in our technology have made it possible to launch a VPN service that is of terrestrial quality and at near terrestrial pricing," he added.

Plan Name	Speed (Kbps)	Typical Price Per Annum
VPN 32	32	29,176
VPN 64	64	45,959
VPN 128	128	75,351
VPN 256	256	138,308
VPN 512	512	230,658
VPN 1Mbps	1024	359,227
VPN 2Mbps	2028	694,803
